BetterDay™ Health, UAB

A US-based company **BetterDay™ Health** is expanding their international team and is looking for ASP.NET MVC Developer to join their team in Kaunas.

BetterDay™ Health provides an affordable Electronic Health Record (EHR) platform to ambulatory clinics and healthcare providers, called the Better Day™ EHR & Documentation Solution. By creating a first-of-breed smart, 3rd-party application-enabled web-based EHR platform, Better Day™ addresses the complex needs of today's healthcare providers with a mission to dramatically simplify and improve the user experiences. Better Day™ is a web-based software platform that uses predictive modeling and 3rd-party applications & devices to turn data into action and, in doing so, actively facilitate patient-provider collaboration in order to proactively manage health, fitness & chronic disease.

Position offered:

ASP.NET MVC DEVELOPER

Job description, tasks

- Deliver complex .NET 4.5 / MVC 5 / C# / ASP.NET solutions, including documentation and unit testing;
- Apply technical processes to solve complex problems;
- Work within an Agile development process.
- Develop quality products and deliver them on schedule.
- Coordinate with project work teams to ensure adherence to policies, achievement of quality targets and delivery on schedule milestones.
- Ability to work remotely.

Requirements

- At least 1 years of functional web development, web programming and architecting and planning quality technical solutions;
- Understanding of web development using C#, Visual Studio, .NET (4.0, 4.5);
- We hope that you are a self-started individual, able to perform in-depth research in completely unfamiliar field, like general medicine;
