

Software Developer - Internship

We are looking to expand our IT Team through a diverse set of people, who will work alongside other experienced developers in a creative learning environment, and gain exposure to a broad range of technologies during a 6-month voluntary placement scheme. We have been working on the company's infrastructure based on a core platform of Microsoft SQL, PHP, JAVA, and mobile applications. This architecture integrates in real time to Business Object Visualization systems. This is an excellent opportunity for a bright, talented technology enthusiast to contribute to both short and long-term development projects. We have a very strong aggressive roadmap (SCRUM) to speed up the rollout of our strategy by expanding our core team. If you want to boost your career, improve your skills, and get involved in several different projects in such a short time, we are the right choice for you. Are you the right choice for us?

Areas of Platform Work

- Tailored Portals for Clients, Management & Employees.
- Mapping & GPS Realtime Systems
- Shopping Based & Resource Planning
- Paperless System
- Metric & KPI Dashboards (RTS)
- Automated Response Events based on text, email and voice platforms

Desirable:

- Experience in SQL using Microsoft SQL Server 2000/2008
- Front-End: Html, CSS, JavaScript, JQuery, Ajax
- Server side: PHP, Groovy
- GPS / Geolocation and Tracking System
- Worked with Intrex Platform
- Real-time Data Visualization Systems and Dashboards

Are you ready for the challenge and a unique experience? Email your CV & cover letter to joinus@3iis.uk. Our recruitment is ongoing!
